Art Unit: 1775

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-9 are rejected under 35 U.S.C. 102(b) as being anticipated by Hofmann et al (5,330,853) .

Applicant's arguments filed 7/7/05 have been fully considered but they are not persuasive.

Regarding Hofmann et al, while the applicant correctly states that the most that the second layer ration of Ti to N can be is 1.3, figure 13 shows that the first layer has a higher nitrogen content (52) than the second layer (51) . Thus it is the applicant's position that the first layer falls within the claimed range, and thus the rejections stands.

3. The Barsoum references clearly show the relationship of the claimed layer when  $n=2$ .

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 1775

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
